

Dear Practice Manager,

My name is \_\_\_\_\_ and I am interested in applying for the nurse practitioner position at the Oregon Kidney and Hypertension Clinic. I recently graduated with my Doctor of Nursing Practice degree from the Family Nurse Practitioner program at the University of Portland. I am excited to work at a mission-driven organization that provides opportunities for ongoing learning and long-term career growth.

I have completed clinical rotations in family medicine, mental health, women's health, pediatrics, urgent care, drug and alcohol rehabilitation, geriatrics, dermatology, and cardiology. The rigor and diversity of these placements have prepared me to care for a variety of complex patients across the lifespan, including those with hypertension and renal disease.

Through the DNP program, I have gained knowledge about organizational and systems leadership, health care policy, and analytical methods to assess research. I have also learned effective communication, leadership and advocacy strategies, as well as implementation science skills to address quality improvement needs. I had the opportunity to practice these skills for my DNP Scholarly Project. I thoroughly enjoyed the process and I have the skillset to continue to assist with quality improvement projects to promote positive patient outcomes.

The ability to positively contribute to the health of a person and their family throughout the lifespan is a meaningful and unique attribute of the family nurse practitioner role. In order to provide quality and safe patient care, I value evidence-based practice and the compassionate delivery of individualized care. I am a collaborative and supportive team member and I consistently maintain a strong work ethic.

Please see my attached resume for additional information. Thank you for your consideration and I look forward to hearing from you.

Sincerely,
